DETAILED ACTION

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1, 4-5, 7-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fronsman in view of Japanese patent 51-119632 and Naumov et al. (Naumov), U.S. Patent 4,604,175.

The Fronsman patent does not disclose that the system is a closed system which prevents gas from escaping from the solution. The Naumov patent discloses the electrolysis of an etching solution, wherein the chlorine gas formed in the anode space remains in the solution by being absorbed in the reactions (see col. 3, lines 1-14).

Accordingly, the claims as a whole would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the disclosure of the Fronsman patent with the teaching of the Naumov patent, because the Naumov patent teaches the reabsorbing of the chlorine gas formed into the solution as claimed.

Claims 2-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fronsman in view of Japanese patent and Naumov as applied to claims above, and further in view of Harms of record for reasons of record.

Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.
